

HYPERBARIC CHAMBER MAINTENANCE AND REPAIR SERVICES

- **PREVENTATIVE MAINTENANCE (PM) & REPAIR**
- **SEAT & SEAL INSPECTION & OVERHAUL**
- **ON-SITE WINDOW REPLACEMENT SERVICES**

Hyperbaric chambers are designed and manufactured to operate safely and efficiently for many years. In fact, it is not uncommon to see chambers that have been in operation for 30 years or more. Like any piece of equipment, routine service by a qualified professional is needed to maintain its optimal functionality and safety.

PCCI Service Professionals have many years of experience and are trained in maintaining many brands of monoplace and multiplace hyperbaric chambers. Therefore, we are able to perform corrective and preventive maintenance on different brands of chambers in one trip saving our customer time and money. The PCCI Service Professional team is backed by senior Professional Engineers that have many years of experience in designing, engineering, building, installing and maintaining both monoplace and multiplace hyperbaric chambers.

We can perform emergency repair services in the event of an unexpected malfunction of your chamber.

We also provide the PVHO-2 required seat & seal inspection, overhaul, and window replacement on site for both monoplace and multiplace chambers.

The services we provide include, but are not limited to, the list below:

- Annual Preventive Maintenance (PM) in the form of single or multi-year contracts
- Comprehensive maintenance plans that include yearly Preventive Maintenance as well as any unscheduled Corrective Maintenance (CM) visits. This plan also includes unlimited technical phone support
- PVHO-2 required Seat & Seal and overhaul services at customer site. There is no need to ship the chambers back to factory for service
- Monoplace and multiplace chamber window replacement services provided at customer site. There is no need to ship the chamber(s) back to factory for service
- On-call safety inspections, evaluations, and appraisal services
- Operational and emergency procedures developed for customers as needed
- Customer service and support provided throughout all phases of service or upgrade
- Maintenance and upgrade work can be performed over the weekend to avoid or minimize chamber down time
- 12-month warranty on labor and parts used by our professionals for service or upgrade
- Equipment used for gauge calibration is properly certified and calibration traceable to NIST standards
- Hyperbaric chamber installation and relocation services provided domestically and internationally
- Multiplace chamber upgrade services provided to include new features or to improve performance of existing system(s)
- We service all Sechrist, Perry and other manufacturer monoplace chambers. Our technicians are also trained to service 'orphan' chambers such as N-system, Proteus E1 and more

Call us for your chamber service price quote. We look forward to being of service.
